

AI Developer Intern

Job Details

Job Title: AI Developer Intern

Job Type: Internship (Full-Time)

Duration: 3–6 Months

Experience: Freshers / Students / 0–1 Year

Location: On-site / Hybrid / Remote

Stipend: As per company policy

About the Role

We are looking for a passionate AI Developer Intern to join our AI engineering team. You will build AI-powered applications using Python, Large Language Models (LLMs), Machine Learning, LangChain, and modern backend frameworks while working on production-ready solutions.

Key Responsibilities

- Develop AI-powered applications using Python.
- Build LLM features using OpenAI/Groq APIs.
- Create RAG pipelines with vector databases.
- Build AI agents using LangChain and LangGraph.
- Develop REST APIs using FastAPI or Django.
- Perform data preprocessing, prompt engineering, and model evaluation.
- Collaborate with cross-functional teams.
- Write clean, maintainable code and documentation.
- Participate in code reviews and testing.
- Stay updated with the latest AI technologies.

Required Skills

Programming: Python, OOP, SQL

AI/ML: Machine Learning, Deep Learning, NLP

Frameworks: LangChain, LangGraph, TensorFlow/PyTorch, Hugging Face

Vector DBs: FAISS, ChromaDB, Pinecone (Preferred)

Backend: FastAPI or Django

Tools: Git, GitHub, Docker, Postman

Educational Qualifications

Bachelor's degree (or pursuing) in Computer Science, AI, Data Science, IT, or related field. 2024–2026 pass-outs are encouraged to apply.

Preferred Qualifications

- AI/ML or GenAI projects
- Knowledge of RAG, embeddings, prompt engineering
- REST APIs and databases
- GitHub portfolio

Soft Skills

- Analytical thinking
- Communication and teamwork
- Fast learner

- Problem-solving mindset

What We Offer

- Real-world AI project experience
- Mentorship from AI engineers
- Exposure to LLMs, AI agents, and MLOps
- Learning-focused environment
- Potential full-time opportunity
